# Learn Adobe Flash CS3 – A Beginner's Guide
Keyframe – Strobe Light Multi-Color

Multiple colors can be used to add to the strobe effect. While this can be annoying, it does help demonstrate the timeline and what content is seen for a specified amount of time.

1. Select the Oval tool and draw an oval on the Stage in cell at Frame 1.
2. Insert Keyframe at 3, 5, 7, 9, and 11.
3. Double-click the oval at each of those Keyframes and change the Stroke and Fill colors.
