

Learn Flash – A Beginner's Guide

Keyframe - Strobe Light Single Color

Once Keyframes is introduced someone will figure out how to do the flashing light trick known as the strobe light effect.

1. Select the Oval tool and draw an oval on the Stage in cell at Frame 1.
2. Insert Blank Keyframe in the cell at Frame 2.
3. Test Movie = Ctrl + Enter.

Flash Note: The dimensions for this movie are 100 x 100 pixels. Remember the total Stage is exported when finished.
